To: Alex Elvin <elvin@mvcommission.org>;

Hi,

Just wanted to point out that many local workers on Martha's Vineyard are working in the Landscaping business and using their skills to maintain an all natural grass field as opposed to importing a huge plastic carpet from Off Island makes little sense to me. It's time to remember that is the natural landscape of Martha's Vineyard that has made it the desired destination it has become to the benefit to those who have worked hard to make it a place for year round living.

Please vote to reject the plastic artificial turf proposed for the High School fields.

Thanks, Roger Becker
