Re: DRI #621 - Bradley Square

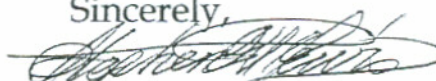

Gentlemen:

I am a resident at 4 Warwick Avenue and have read the above proposal, reviewed the plans and after much thought and speaking with neighbors, I would be opposed to this projects intentions as presented.

I am not against progress but it seems that the project proposed and number of spaces for parking of vehicles and mentioned plans to change Warwick Avenue to a one-way street with parking to accommodate users and occupants of the Masonic Avenue buildings would very much disrupt this neighborhood as it would create a parking problem for myself and other residents of this street.

The hugh size of the buildings will certainly change the normal Oak Bluffs residential climate. It wold make this area look out of order. It would be good to have the two additional buildings downsized to be more in line with this area and thereby allow more free space to accommodate adequate area for the buildings parking needs.

Sincerely,

Stephen W. Lewis
