>>>> To the Martha's Vineyard Commission and Oak Bluffs Planning Board,

I have been a resident and tax payer of the town of Tisbury for over 25 years. I have two children attending the Tisbury school currently. I am appalled by the possibility of having plastic playing fields for our children and community. It is hazardous to the health of the players and the island at large. It is irresponsible and will produce great harm environmentally as well. With so much information explaining how dangerous these materials are I am shocked that you are even considering this and continue to consider this after so much debate. Please only use non-toxic grass for our playing fields. Natural grass is the only option for the health and well-being of our children, community, island and world environments.

Thank you.

Sincerely,

Steve Solarazza
