Dear MVC,

As residents of West Tisbury, we have followed the Stillpoint project, and look forward to the success of its important public mission. We were dismayed to read the LUPC draft conditions of 2 January 2023. Some of them seem extremely unreasonable. They are particularly unfair in light of the fact that Thomas Bena, as part of this Stillpoint project, has enabled the public benefit of 6 permanently conserved lots and 2 development-restricted lots in the Mill Brook Watershed. We respectfully request that the Commissioners give due weight to these important facts.

We are strong believers in Stillpoint's goal of being a place for open discussion on many critical issues including the environment, island development, etc. which should work hand-in-hand with the MVC and your important mission.

Sincerely,

Joshua Thomson
