

2 Acres of Synthetic playing field at MVRHS

To: Alex Elvin <elvin@mvcommission.org>;

Dear Members of Martha's Vineyard Commission,

The synthetic playing fields worry me as I'm concerned about bringing more plastic and chemicals to the island. Watching the investigative, in depth presentation by Hollands news media Zembla on the artificial turf in Europe tells it all. No recycling but a place in Denmark. And the fact that this field sits on top of our aquifer. I do think this is a really bad idea. Sports and competition is second fiddle to our islands health.

I do like my drinking water.

Thank You,
Stina Sayre
