To: Alex Elvin <elvin@mvcommission.org>;

Hello MVC,

Please decline the proposal to install a synthetic turf field at the high school. The financial and environmental are numerous and have been clearly laid out by the Field Fund.

There are more pressing issues that the high school is, or should be, dealing with.

As the lead regulation agency on the island, I hope you will see the snake oil you are being sold and choose the natural alternative that is safer for the students and the earth.
